

## Another Dragon To Slay

It would be difficult to conceive of a more worthy movement of an humanitarian character than the drive which is now being launched across the Dominion to make a co-ordinated and well directed attack upon one of the greatest scourges of our time—cancer.

The fact that to date medical science has been unable to ascertain the cause of cancer or to find a specific cure, once an advanced stage of the disease has been reached, should not dispose people to throw up their hands and admit defeat, but, on the contrary, this coupled with the further fact that the disease is on the increase, should act as a stimulant to the efforts which are now being instituted, first to mitigate the extent and severity of this menace and later, perhaps, to cure it in its inception.

### Public Aid Needed

Entire medical authorities who have completed a mission across Canada in an effort to elicit public support for an organized campaign against this dread disease, freely admit that the medical profession can do nothing more than it is now doing in its attempts to reduce the incidence and death toll from cancer without public support.

In other words, if the general public, who have cause to be apprehensive of this cancerous infection in their bodies, will visit their doctors on the first breath of suspicion and thus ensure early diagnosis, there is no possibility of further reducing human suffering and loss of life from this cause at any rate unless we as its cause and cure may be discovered in the laboratory or elsewhere.

To the end of increasing the general public knowledge of symptoms which may not yet indicate the onslaught of cancer in its earliest stages. In view of the insidious nature of the disease, this knowledge is the most valuable ammunition which can be used in the battle against cancer at the present stage of medical research and must remain so until science itself reveals some of the mysteries surrounding its cause and cure.

### Pubic Enemy No. 2

The facts show that in this country cancer ranks second to heart disease as the chief killer of men. Last year between 11,000 and 12,000 victims of this disease died. Next year the disease will send as many or more to an untimely grave, unless the public take the necessary precautions of reduce its toll.

That it is not difficult to attain at least a partial insurance policy against death from cancer is quite evident when the list of conditions which may be covered by insurance, as outlined by these authorities, is known and studied. They are a cramp in the chest, a sore tongue which continues to be sore; a hardness or lump in the breast which gives no pain; a hoarseness of the voice which persists past the duration of a common cold; difficulty in swallowing food; symptoms of vague indigestion on the part of the stomach; thoughts of a cancer in the breast, a wart on nose, which, in particular, begins a rapid, rapidly an persistent bleeding from any orifice of the body or a comparatively sudden alteration, in any manner, of usual bowel evacuation habit.

"If you have discovered any of these signs and symptoms," according to Dr. A. T. Basin of Mayo Clinic of Surgery at McGill University, "the first thing to do is to see a specialist doctor, but on the other hand the chances are one in four that early cancer is the cause."

If this information means anything at all, it indicates the immediate necessity of the person noting any one of these suspicious conditions immediately consulting his or her physician and then Dr. Basin says: "The problem is then his, also the responsibility, unless you refuse to accept his advice."

### A Delayed Campaign

In the light of the under-mentioned statement, a large percentage of cancer victims do not present themselves to their medical advisers until they have passed the stage when a cure might be effected, the value of the information now being given to the public through the efforts of the Canadian Medical Association and the Canadian Society for the Control of Cancer can readily be understood. The pity of it is that this campaign has not been started earlier, because as it has been in some other countries, many lives could easily have been saved.

Taking into consideration the nature of the disease, its growing incidence and the urgent necessity for public enlightenment if its toll is to be curtailed, the argument that the medical profession may frightened the people by giving them a scare is entirely specious. Lord Monbrial of Lons and London, England, one of the greatest of British surgeons who instituted a similar campaign in the Old Land is quoted to have met this charge by stating: "I am frightening them to life." Dr. Basen states: "Many people have died from cancer. No one has died from fear of cancer."

### Will Continue Research

**Professor Freund, Formerly Of Vienna, Working In London**

In London, a Professor Freund, a most eminent German, a specialist medical expert, who has worked over 50 years on cancer research. He is now to continue his work in a specially-built laboratory in London, reports the London Daily Sketch. An American, Mr. Frederick Pearson, will finance the installation of a special research station as an annex to the West London hospital. Arrangements have been made now that members of the hospital board, who have been on holiday, have returned to London. Professor Freund is in London with his assistant, Dr. H. J. W. Kastner, who has helped him in his work for over 20 years in Vienna, where she was second in command at the Pearson Research Institute, now to be transferred to London.

Still, if you haven't the right to enter a stranger's home by the door, what right have you to enter by the telephone?

Government statistics show that the average family in Australia eats 1,372 kinds of food.

## TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen In Your Blood and You'll Get the Pep That Sends You Boundin' Up The Stair.

People who smother to death like bananas, are slowly suffocating to death like bananas. Red capsules are your oxygen-carrying tablets. They are the best oxygen-carrying tablets in the entire part of your system. Without enough oxygen, you are bound to feel tired and weak. These tiny pills help you move more and faster. They give you more pep. They carry oxygen-carrying power of your blood. Get Dr. W. H. Dill's Oxygen-Carrying Tablets. Get them at your druggist's. See for yourself how quickly the pep comes. Then get a bottle and send us back your pop. cap. 100c. G.T. Peptol Co., Ltd.

### Menu Cards Were Popular

**Guest At Royal Luncheon In Ver- salles Wanted Extra Copy**

The menu for the state luncheon at Versailles, arranged by the British King and Queen, were printed on cream paper in the style of type found in first editions of Voltaire. As popular were the menu cards as the extra copy of the "Times" for £2 for an extra meal to take back to his family. Each guest received a reproduction in bronze of the famous medallion struck by Louis XIV, to commemorate the completion of the chateau in 1687. The King and Queen received similar medals in gold.

### Earnings Of The Quints

**Audit Of Their Finances Shows Amount Is \$800,000**

The Dionne Quintuplets have earned \$800,000 since their birth four years ago last May 28. It was recently learned from an audited statement of their financial affairs that the money was made by Dr. D. Wilson, Ottawa, one of their guardians, and Keith Munro, their business manager, to a meeting of the board of guardians at North Bay, Ont.

### Hardship Persists

Many folks have now electric clocks and are relieved of the hardships of our forefathers who had to wake up in the middle of the night. However, no mechanical姑娘 yet has done away with the necessity of putting out the cat.

A lightweight, collapsible portable house designed for conveyance on the roof of an automobile has recently been patented. It is reported that the house will sell for less than \$100.

Perhaps you know that Italy has a king. But he is not working at the job.

A good deal of horse sense went with the horse.

You'll beam with de-flavour of this grand-tasting cigarette tobacco! Ogden's Fine Cut has a smooth, mellow taste, and is smoking for roll-your-own every way. Why not learn for yourself? Our Ogden's smokers tell them all when it comes to giving you the best possible taste—choose the best paper—choose "Chandler"—and light up for pleasure!

### Had Equal Right

**Quick-Witted British Surgeon Has Prussian Officer Stumped**

It is said that the face of Sir Louis Grieg always seems on the verge of laughter. King George V, once asked him if he was a jester. Louis was like a laughing tonic. Sir Louis and the present King were boyhood friends. They were together in the training ship Cumberland. Later Sir Louis became the Duke of Cambridge. He has been a Prussian sportsman all his life. As a youth he captained the Scottish international team four times. In tennis and football he was a double title in the Army. The Prince served overseas as a naval surgeon. After the fall of Antwerp he was captured when he stayed behind to tend to the wounded. He typified the qualities of a naval surgeon.

"What are you doing in Belgium?" Sir Louis replied: "If it come to that, what are you doing in Belgium?" The Prussian was stumped.

### SELECTED RECIPES

#### CHOCOLATE FUDGE

3 cups white sugar  
1 cup Bee Hive Golden Corn Syrup  
½ cup milk, evaporated  
2 tablespoons butter  
2 squares cooking chocolate  
½ teaspoon salt  
Melt butter and chocolate slowly atop a double boiler. Add sugar and salt except vanilla and boil until it forms a firm ball in cold water, stirring to remove from fire and let stand until lukewarm. Add vanilla and beat until smooth. Get a shallow pan, turn it out on buttered tin. Nuts, cherries or raisins may be added while beating.

#### COCONUT FUDGE

½ cup Bee Hive White Corn Syrup  
½ cup cold water  
½ cup white sugar  
2 eggs whites  
1 teaspoon vanilla  
1 cup coconut, dried

Cook syrup, water and sugar together until it forms a firm ball. Add eggs, vanilla and coconut. Turn out onto a buttered tin. Dry cherries, chopped candied ginger, etc. Turn out buttered pan.

#### Here's A Suggestion

**How To Keep Rooters From Crowding Inside Your Mouth**

Pubescent boys, local poultry flocks follow the suggestion offered by Laura M. Smith, of Canon City, Colo., for masking possible a mauling along in the rooters. She relates that the rooters placed near the ceiling so that when one would raise his head to crow he would bump his head on the ceiling and changed his mind about crowing. Thus the birds never crowded until they were on the ground.

#### Angered Little Birdie

The bird-phobe Orrin C. Wright was 67 on Aug. 20. In 35 years since his famous flight with a heavier-than-air machine, with his late brother, it is said that the control system he invented has changed very little.

In ancient Russia unfaithful wives buried waist deep in damp earth and left to die of starvation.

The 20 Latin American countries are estimated to have now over 130,000,000 population.

### Another Canadian First

**Canada Ships Canned Tomato Juice To United Kingdom**

According to the statistics of the Imperial Economic Committee, Canada leads in shipments of canned tomato juice to the United Kingdom. Arrivals of canned tomato juice at the principal British ports during the four weeks ended July 30, 1938, amounted to 7,057 cases, compared with 5,200 cases preceding four weeks, and 12,985 for the four weeks ended July 31, 1937. Canada supplied 4,648 cases, and the United States 2,400.

Exports of tomato juice into the United Kingdom during the first seven months of 1938 totalled 29,668 cases, of which Canada supplied 8,111, the United States 10,942, and other countries 1,915 cases.

### Peria Completes Railroad

**Built 866-Mile Line Without Any Outside Financial Help**

By completing the railroad from Bandar Shah on the Caspian Sea to Bandar Shahr on the Persian Gulf the government of Persia (formerly called Persia) has provided a means of transportation from north to south which is confidently expected

not only to promote the development of the country but greatly to improve its means of defense.

The road is 866 miles in length,

in the south crossing the Luristan Mountains at a height of more than 7,000 feet, and in the north rising almost to the same height in the Elburz Mountains.

Work on the line was begun seven

years ago, and the Central Committee, composed by the Shah on February 19, 1937. It was supposed that the line would not be opened from sea to gulf until next year, but the railroad is expected to have been built faster than was anticipated. The cost of the railroad has been defrayed by Iran without aid from beyond its own borders. This imposed hardships on the country, but it may be offset by the fact that the line has no foreign bondholders to consider.

The Shah was won to San Francisco to witness the opening ceremony on August 20, and himself completed the line, a brilliant assembly being present at the ceremony. Throughout the country as well as along the route the meeting of the rails was celebrated and Teheran was decked with flags.—New York Sun.

Tragic Story

### History Of The Colonization Of Greenland By Icelanders

Probably not in the history of colonial development is there a more tragic and interesting chapter than the colonization of Greenland by Icelanders nearly 1,000 years ago. The Danish government and its researchers have laid bare the whole story.

Only 500 years after the

discovery of America

in the 11th century, the

# POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER ••• W.N.D. SERVICE

CHAPTER V.—Continued

Mr. Joyce laid aside her green cigarette holder and with that queer, coldly acquiescent mood which seemed a permanent part of the rest of the group on the tiny veranda. The moon had risen shimmering the great expanse of Sapphire lake, lying now like an irregular plate of silver before the rugged mounds of black hills.

"It's an inlet, over there to the right," Hammond said. "Land on that and you'll be safe."

"Safe?" broke in Kay, with a little laugh. "What's that?"

"The Mountains. This is a boozey trip, isn't it?"

Kay faced the aviator. "Timmy, you're gone from foot bootlegging already?"

The tone was jesting, but Timmy was tired.

"It isn't against the law to bring liquor into the United States territory to American territory. I'm not speaking anything into Canada."

"Who's this fellow who hired you?" Hammond asked. Curiosity pulled hard at him; he was sure it was the man who had ruined Jeanne Towsler. Timmy rubbed his round face.

"Damned if I know. He paid me his Joe's bill. I guess he worked for Arvin or the World Ambulance. Kay laughed, somewhat harshly.

"So that's what becomes of our darling Timmy. He comes into the new, unfettered North and immediately becomes a bootlegger."

It was a bad time. Timmy Moon's nerves were raw, from a long session at the stick.

"Well, at least I'm honest about it. I'm not being a damned pretender."

"Why, Timmy?" asked Kay, with an air of amazement. Who's pre-tending?"

"We've all been pretending," said Timmy Moon. Jack caught the scent of liquor on his breath; and evidently Lew Shade, whoever he was, had been generous. "And I'm sick of it. We're going to let's be honest at last we've been."

"Timmy!" in the reflected light of the doorway, Hammond saw that the girl's face had gone white; there was rage in her eyes. The aviator did not move.

"Don't Timmy me!" he exclaimed.

"We're all broke and we might as well say we're broke and be done with it."

"Perhaps you'd better go to bed," said Mrs. Joyce icily.

"I think that's a good idea," Hammond took him by the arm. "Time for us to go, Timmy."

They went right out and little pilot was grinning again. "I didn't mean to start any fireworks."

Hammond puffed off the verandah and with an effort at a joking and with two women, led him down the trail.

"Sorry I can't put you up in my cabin," he apologized, when they were well along toward town. "But we only got room there."

"Oh, I can't go anywhere," Timmy rubbed his hands over his face. "Wow, how a couple of shots can hit a fellow when he's tired."

"You rather spoke out of turn up there at the house," the miner suggested.

Timmy raised his head, pulling hard for air.

"You! I guess I did," he confessed.

## PATENTS

AN OFFER TO EVERY INVENTOR, LITERATOR, SCIENTIST, and artist in the LAND. THE RAMSAY COMPANY, LTD., 100 Bay Street, Toronto, Ontario, Canada.

To help END a cold sooner  
**VICKS VAPORUB**  
—rub on throat,  
chest, and back,  
at bedtime

—it was just like seeing a ghost. Did you hear me? I almost shrieked. The poor fellow must have thought I'd gone crazy. I did feel like an idiot."

Hammond agreed that it was indeed a silly feeling. "I wish I could have been there to take the call up to the cottage. But he carried with him an uneasy presentiment that Jeanne Towsler had not told the truth.

Kay was waiting for him, as well gowned as if she had come from a beauty parlor. Hammond watched the sun play on her haleless head, as with her mother, they went down the steps. They crossed the lawn to the Loon rock, the minx pointed out the claim which he had saved for her, a stretch of gravel extending along the stream, near upturned stones and earth to where working held her.

"I got them as near mine as I could," he announced.

"And is this a claim?" asked Kay. "Why, it's just the bank of the stream."

"Look," Hammond answered. All along the creek were evidences of labor. Here and there, disregarding the high water, men labored at the shore, with pick and shovel, to dig out sluice boxes with, picking up the water from a rume, running from a higher point in the stream, carried it down on a slow decline.

"You just think it through and it becomes gold," Kay said suddenly.

"Isn't that cute?"

"It looks like a day laborer's job to me," her mother reflected.

A shout answered her, and up and away, with the redoubt Olson and two partners were working. In

stanly labor stopped elsewhere.

Necks craned. Heads appeared above the highest portions of earth, where the water had been held back by banks.

"They must be coming to converge upon the sluice box."

"Le's go up," Hammond exclaimed. Olson's "found" son came in the clearing.

"The clean-up?" Kay asked, hurrying beside him. Mrs. Joyce followed somberly behind her, a woman who seldom smiled, who seldom gave a smile, who seldom gave a laugh, weighing everything within her range. Hammond turned to explain.

"Yes, the clean-up. You see, those water holes are called sluice boxes. They get out the dirt at the bottom, called riffles. The dirt is shoveled in at the top and is carried along by the water. The dirt and light gravel flow on. Anything finer than gravel goes into the riffles."

"Oh, I see. Then you stop shoveling and pick up the gold."

"Not that easy. It takes a long time for those riffles to fill up. Then everything that you could be scraped is after that the miners pan it."

"Pan it?"

"Yes—there's one." He pointed to a discarded gold pan on the creek's edge, which lay on the rocky, sloping sides. "They put the accipments in there and dip water into it, swishing it around. It takes a long time to get rid of everything but the nuggets."

"Isn't it wonderful to see a nugget again. Like those you gave me in Seattle."

Hammond laughed.

"It looks like you'll get your wish, Olson's pretty excited."

## Became World Famous

But Young Scientists Discovers Up Work And Has Disappeared

A young scientist who probed deeply into the secrets of Nature has vanished after declaring that science has gone far enough. Now he is being sought by the world.

In his hideaway in the hills of El Dorado, Mejorana, world famous atom-splitter, praled by Lord Ruthford. Shortly before he disappeared he wrote to a friend: "Please tell me when I can return to science and return to science again."

"What's a week?" asked Hammond. "You'll be the merchant queen of Sapphire lake, first thing we know."

"I'm afraid I'm getting as bad as you prospectors," came with an uneasy laugh. "I've been wishing for another mining rush."

"Why?"

She flushed her shoulders.

"Oh, I don't know—the excitement, I guess, the thrill of going somewhere." Then, "I'm sorry, that doesn't sound right."

"But this camp hasn't really gotten started." Quickly he asked, "Jeanne, what's bothering you?"

"Spring, maybe."

She faced him. "What else?"

"Sure, that was man in the restaurant last night?"

"Oh, that," she exclaimed, with a smile that for the moment disarmed him.

"I was all too silly. I could have known I knew him—a boy I'd gone to school with up in back home."

"It was a mistake then?"

"Oh, yes. I'd looked up hurriedly."

India is trying to stop the dumping of salt into the country by outsiders.

In Kenya, British possession in East Africa, wild animal shooting is carefully regulated.

## Nothing Wrong With It

"Purge" Still Is Considered A Personable Word by Women

A woman in New York writes to her favorite newspaper to say that she doesn't like the word "purge". She wonders why so many political writers in this country have "avilidly" used it and show a liking for it. She says that the ideals and institutions are so at variance with ours."

Apparently she thinks that "purge" comes out of Germany or the Soviet Union, China, where the thing it stands for is known, but the word itself is not.

The ancient Romans used the verb "purge" or "to make pure."

She asks if it is up and passed on to the English.

Shakespeare and the King James Bible refer to "purges" and "purging".

The first use of the word in its present political sense appears to have been in connection with "Pride's Purge".

Gen. Thomas Pride was deputed by Cromwell in 1655 to purify the House of Commons by ejecting from it all members who refused to vote as Cromwell wished them to do.

With that distinguished pedigree, pride is now a household word in this country object to the purging of this and that, too, many government agencies.

Detroit Free Press.

## A Changing Shore Line

Launching Of Big Ships Banks Banks

On Clyde Moving

If any one thinks for a moment that he or she can escape the new world of the moving day, he hasn't been about within the past month.

There are whole-heated opposition from many of the wharves which are the many sanctuaries and centres of wild life conservation that have arisen as a direct result of his election. Not only have many individual refuges for birds been established, but, too, many government sanctuaries.

Prevention, no cure of the ill of man's relationship to his wild creatures, makes it difficult to understand why he has not been able to do more.

Governments, too, realize that without preservation of wild game, man's relationship to his wild creatures, makes it difficult to understand why he has not been able to do more.

This simple woodsmen with such clear-cut views on conservation is a wild creature in itself. When he has followed a tractor and disc in preparing ground before his home for flower planting. Few passing motorists recognized the sturdy figure in the broad-brimmed straw hat and wide-brimmed overalls as the noted naturalist.

It is the next morning.

They are the most understanding, most thoughtful and wondering when, if ever, they will be allowed to pursue their heretofore peaceful ways and perhaps catch a fish or two before Cunard is up and at them again.

## Request Market Survey

Prairie Province Asks Investigation

Of Canada's Live Stock Industry

A complete investigation of Canada's live stock industry is being made by a committee appointed by a conference attended by representatives of the three Prairie Provinces held recently at Regina.

The resolution, moved by Hon. D. B. Mullen, Minister of Agriculture for Manitoba, and seconded by Hon. D. B. Mullen, Minister of Agriculture for Alberta, was passed with the objective of obtaining information concerning the live stock industry through eliminating extreme price fluctuations and transportation and production difficulties.

The conference, sponsored by a committee set up by the Manitoba Legislature last winter, was one phase of the work being done by that committee. Already marketing methods in both St. Paul and Regina have been studied. Dr. J. A. Munro, M.L.A. for Dufferin, is chairman.

## Claims World's Record

Australian Farmer Sows 920 Acres

Of Wheat In 12 Hours

An Australian farmer in Victoria has sown 920 acres of wheat in 12 hours, which he claims to be a world record. In six days he worked night and day, and travelled seven or eight miles an hour. Four men worked the tractor in six-hour shifts.

## Freases When Touched

Puro water, standing quietly in a laboratory doesn't always freeze at the freezing point of 32 degrees. Indeed, in such circumstances, pure water remains liquid until the temperature drops down to zero. But the instant the water's touched, it turns to ice.

The sea cucumber, a relative of star fishes, discards portions of its body when food becomes scarce, and replaces them when times get better.

As a token of mourning when their favorite cat died, ancient Egyptians shaved off their eyebrows.

The royal mint of Great Britain makes coin for all countries, with the exception of France and Germany.

# WORKERS FOR WORLD PEACE

Although we follow with our hopes and our prayers the efforts of the many sincere workers for peace in the world today, we sometimes wonder why such endeavor should be necessary. We feel sure that the average man and woman in other countries are like ourselves. They want no war.

Has it occurred to you that many of these peoples, peace-loving though they may be, are deprived of the information that would enable them to choose wisely their course of action? Instead of news they are given propaganda. The facts are colored or misrepresented or suppressed. They have been robbed of the right to think for themselves.

Perhaps a permanent peace could have no better practical foundation than a free press throughout the world. We who have free access to all the news, take it for granted and treat it lightly. Yet, having this pledge of freedom, we should cherish it, bringing our children up in the knowledge and appreciation of this safeguard to their liberties.

Use your opportunities to be fully informed on all matters that affect your life. Give your family the benefits that a good newspaper can bestow.

**The East Likes Western  
Poultry to the Tune of Nearly  
\$2,000,000 a year**

Not only do Western hens lay for the East to the extent of over 50,000,000 eggs a year, but over 6,000,000 lbs. of them, and their consorts, go East in person to grace the dining tables of Eastern industrial workers.

The East needs the West to feed it. The West needs the East as a market for its produce; so the two work together — the East by spending over 40,000,000 a year with the Western farmer, and the West — by buying Canadian-built cars.

And that's a point worth remembering, for every car bought in the West helps not only the food-consuming automobile worker — it keeps men working and on payrolls in the rubber, paint, glass, steel, parts, chemicals and many other Eastern industries, to the ultimate advantage of the Westerner himself.

For statistical and further information about this industry, write to  
Automotive Industries, 1006 Lansdowne Building, Toronto.

### DAMS BUILT FOR DUCK UNLIMITED

An expenditure of some \$1,500,000 in public money. The water was drained out of the land. The land was sold for farms. Most of it proved unsuitable for grain cropping. What had been a magnificent marsh

of 164,000 acres, a large permanent waterfowl breeding centre, became another example of disastrous exploitation; a dry region where farm families broke their hearts trying to make a living out of the bog-bottom that should never have been diverted from its natural use. Finally, these fam-

ilies were starved out; schools were closed; and the lands reverted to the municipalities through tax sale process.

With the co-operation of Wetaskiwin and Lakeview municipalities and provincial authorities, Ducks Unlimited (Canada) has undertaken to restore some 29,000 acres of permanent water and marsh at Big

## Town & District

Mrs. Albert Maynard and son Leo are visiting at the home of Mrs. and Mrs. Lucien Maynard, Edmonton.

Mr. and Mrs. J. Wilson accompanied by Mrs. N. A. Riddell spent Sunday at Three Hills visiting friends.

Rev. Mr. W. L. Thompson is conducting an anniversary service at Pincher Creek on Sunday Oct. 22. He was minister there from 1916 to 1924.

Town sports seem to be having better luck this fall as in the last few weeks there have been a lot of the hunters have bagged at least one. One party got three Monday morning.

Alfred L. Johnson, aged 80 years of Strathmore, father of Vic Johnson of Gleichen, passed away at his home Sunday after an illness of 1 month. Mr. Johnson had lived in Strathmore for the past 2 years. The funeral will take place at day at Strathmore.

A model Ford truck and a Chevy sedan contacted one another a the corner near the flour mill Monday noon. One car was bound east and the other south. The Ford appeared to be the least damaged having hit the Chevy front end. The other car had its radiator caved in fenders and running board crumpled front tires torn off. No one was injured in the crash.

Mr. and Mrs. George Allot of Gleichen, announce the marriage of their second daughter, Vera Maxine to Alexander, eldest son of Mr. and Mrs. Alex McLean of Gleichen. The ceremony took place on Friday, Oct. 14, 1938, in Knox United Church, Calgary. Rev. C. Harvey Morrison performing the ceremony. Mr. and Mrs. McLean will make their home in Welland, B.C.

The pictures of India displayed last Thursday evening in the United Church hall were well attended and crowded. Those who did not see the pictures missed a rare treat. For some reason or other when picture are shown in a church people seem to be afraid to attend. Who said this is no enigma to be able to explain. Pictures now a days have to be good, so people can be assured that when they attend picture show in which they attend picture show in which they will be well repaid.

Pete Rishaug, who has been working at Turner Valley for sometime past, after the week end in town and his wife, moved to town Monday, moved his family with his wife, who will reside in future. Mr. and Mrs. Rishaug are old timers of Gleichen having lived here for over thirty years. For many years Pete ran the steam power house here as he was an engineer by trade. At Turner Valley Pete is following out his trade.

Grass this will bring back the waterfowl in thousands; and will benefit ranchers, trappers, farmers, and the entire community.

The first step in this restoration was the construction of two temporary dams last May. These held back water through the summer; the two lakes total area being 1,000 acres. Some 20,000 wild ducks were produced this season. The construction of the two permanent dams — and additions works calling for investment of \$16,000,000 is already under way. The permanent structures will be completed and the development of the entire area to the limit of its natural usefulness, in the production of wild life and waterfowl.

Ducks Unlimited will assume the responsibility of management under a 20 year lease. Any revenues which may accrue from development are to be administered by a Joint Com-

mittee, including representatives of the province, the two municipalities concerned and Ducks Unlimited.

Contracts have also been let re-

centively, by Ducks Unlimited, for con-

struction of water control works at

Wetaskiwin, March, near Kinross,

and a dam on the lower Sulphur

Lake, Medicine Hat. These areas will also be reflected as part

of the program of restoring per-

manent water areas throughout West-

ern Canada, and developing the ut-

most production of waterfowl there-

on.

A postal card notification of a local

meeting in 1917 was recent-

ly received by Scott minister C. Clark.

The postal authorities offered no ex-

planation.

## TENDERS WANTED

FOR PURCHASE OF ALBERTA

GOVERNMENT FARM AT

GLEICHEN, ALBERTA

Sealed tenders addressed to the

undersigned, will be received up to

and including Monday, October 31st,

1938, for the purchase of the Al-

berta Government Farm at Gleichen,

45 miles East of the City of

Calgary, Alberta, Canada.

Part of the N.W. quarter of Sec-

tion 18, Twp. 22, Rge. 22, W. 4th M.

totaling 143.6 acres more or less.

The farm adjoins the town of

Strathmore to the north. The land is

in good condition, has been under cul-

tivation continually, has been well

farmed and is quite clean. Forty

acres are irrigated. The soil is

black and eight inches deep

with mostly clay subsoil.

Farm buildings include good gran-

ary and implement shed, built to-

gether, the former being 36x38, and

the latter 24x30, feet, the granary

being 12x20, feet, and a small granary.

Stables are all new and in only

fair condition, consisting of one main

building 10x32 and 10x10, and a

straw-roof shelter 12x10. Good

well on property with small pump

house and wind fence.

Residence is modern, one-and-half

storey, 30x31, large verandas, full

basement, eight rooms and bathroom,

electric light and water, toilet, etc.

The farm or any tender need not

necessarily be accepted.

W. A. FALLOW,

Minister of Public Works,

Edmonton, Alberta.

October 14, 1938.
